What Are Facet Joints?

Facet joints are small joints located between each pair of vertebrae in your spine.
They allow you to bend, twist, and move comfortably.

When damaged, they can cause:

- Chronic back or neck pain radiating pain to shoulders, arms, or legs
- Stiffness and reduced mobility

Common causes of facet joint disease include:

- Arthritis
- Injury or trauma
- Disc degeneration
- Aging

Signs You Might Have Facet Joint Syndrome:

- Pain that worsens when leaning backward or twisting
- Tenderness over joints in the spine
- Muscle spasms
- Pain relief with rest or injections
- Always consult a medical professional for proper diagnosis. Imaging (like MRI or CT) and diagnostic injections may be used.

HYDRA A.E.R.O.
Anatomic. Elevated. Rigid. Osteofixation

Treatment Options

Initial treatments may include:

- Physical therapy
- Medications
- Injections
- Radiofrequency ablation

But when pain persists...
Minimally invasive options may be the next step.

That's where Hydra A.E.R.O.™ comes in.

What is Hydra A.E.R.O.™?

Hydra A.E.R.O.™ is a revolutionary, minimally invasive implant from Aurora Spine designed to treat chronic facet joint pain.

- Targets the problem directly
- Stabilizes the joint
- Promotes natural bone fusion
- Minimizes tissue disruption
- Enables quicker recovery compared to traditional methods

The implant is inserted through a small incision, guided by imaging for precision.

Why Patients Choose Hydra A.E.R.O.™?

- Less Invasive
- Outpatient procedure
- Shorter recovery times
- Helps you return to your life faster

Ask your physician if Hydra A.E.R.O.™ is the right option for you.
